

Advanced, Sustainable and Redundant

About

Since 2015, Bynet Data Centers has specialized in the locating, planning, establishment, and operation of data centers. The Company has 7 underground and Secured Data Centers nationwide, providing a range of innovative hosting solutions adapted for advanced technologies for its Israeli and international customers.

The partnership with RAD Bynet Group allows us to realize a strategy of establishing data centers and providing the most advanced technological services in the segment and with maximum security. Facilities are operated by veteran operations, support and security teams 24x7x365 who ensure the highest level of SLA and services.
